

EHW Hydraulic Lift Table

- Operation manual
- Spare parts catalogue

Original instruction

I .Configuration diagram

II. Main technical parameters:

Model		EHW5
Capacity	kg	500
Max. lift height H	mm	900
Min. height of table h	mm	380
Table size	mm	820×500×50
Handle height A	mm	960
Overall length	mm	880
Wheel diameter D	mm	125
Net weight	kg	82
Wheel diameter D	mm	125
Packing Dimension	mm	900*510*310

III. Scope of application:

EHW series table lift truck is a kind of high-lift transportation tool which is applicable for short-distance transportation as well as goods lifting and lowering. Besides, it can also be used as station facilities for workshop.

IV. Operation condition:

1. Lift table should be operated on solid and flat ground;
2. Operation temperature: -20-40C°.

V. Notes(warning):

1. Read the instruction carefully before operation and get to know the performance and operation requirements of the lift table. And the hydraulic lift table can't be used unless it is authorized.
2. Do not overload the hydraulic lift table and operate it within the rated load. Overloading will cause damage to the hydraulic lift table and human body.
3. It is forbidden for operators to stand or sit on the table to work.

4. Don't put the hands or feet under the lowering table.
5. Please brake the truck when loading goods to prevent it from moving.
6. Off-set loading is forbidden when loading goods, and the goods should be distributed uniformly on the whole table.
7. Loose or unstable goods are not permitted to be loaded.
8. Don't put goods on working table for a long time.
9. The truck can't be moved when goods are being lifted.
10. The truck can only be moved on flat and hard ground, it is forbidden to be used on sloping ground or rugged ground;
11. When putting goods on table which has been hoisted, the weight of goods should be within rated load, and the goods should be loaded lightly. (Safety valve only works in hoisting process, if the truck has been hoisted, and then put overweight goods on it, the safety valve can't work. In this way, the truck may be damaged.)
12. When loading and unloading goods on hoisted table, don't drag goods in cross direction, which may cause serious off-set loading and make truck turn over.
13. When maintaining and repairing truck, stand bar should be used to support fork arm in order to prevent table from falling (there should be no goods on table), and guarantee the safety in maintenance and repairing.
14. Please operate strictly according to "notes (warning)", otherwise it will bring damage to truck and human body.

VI. Operation methods:

1. Please step on the foot lever for several times to raise the working table.
2. Please lift the handle knob upward slowly, and open the one-way valve to make the working table descend slowly.
3. Please make the brake open before moving the truck.

VII. Maintenance and upkeep:

It is very important to conduct necessary maintenance and upkeep so as to prolong the service life and safety of the lift table. Please check the lift table before operation according to the following items:

1. Whether there is any distortion and bending of various positions of the lift table.
2. Please check the brake of the truck and the wearing condition of the wheels.
3. Check oil leakage in the hydraulic system.
4. Please add or fill lubricant to each friction surface before daily operation.
5. If there is any failure, the lift table should be repaired at once, then it can be put into use again.
6. Change the hydraulic oil every twelve months, choose the following or close brand hydraulic oil according to the climate conditions of different areas:
 - a) YBN32 is adaptive under the environment temperature of -10~+40°C;
 - b) YCN32 is adaptive under the environment temperature of -20~+40°C.
7. Hydraulic oil change methods:
 - a) screw out the sealing screw 11 of the attached drawing (2) with wrench;
 - b) raise the hand knob;
 - c) twist off screw 36 of the oil plug and fill in hydraulic oil.
8. No.1, no.3, no.4, no.21, no.29, no.32, no.40, no.43, no.47, no.48, no.33, no.41 and no.45 of attached drawing (2) are seal components of rubber, polyurethane and nylon. The general keeping time is two years. If exceeding the time limit, it will be aging and this will affect the service performance. If so, please change it in time.

VIII. Trouble shooting methods (referring to drawing 2)

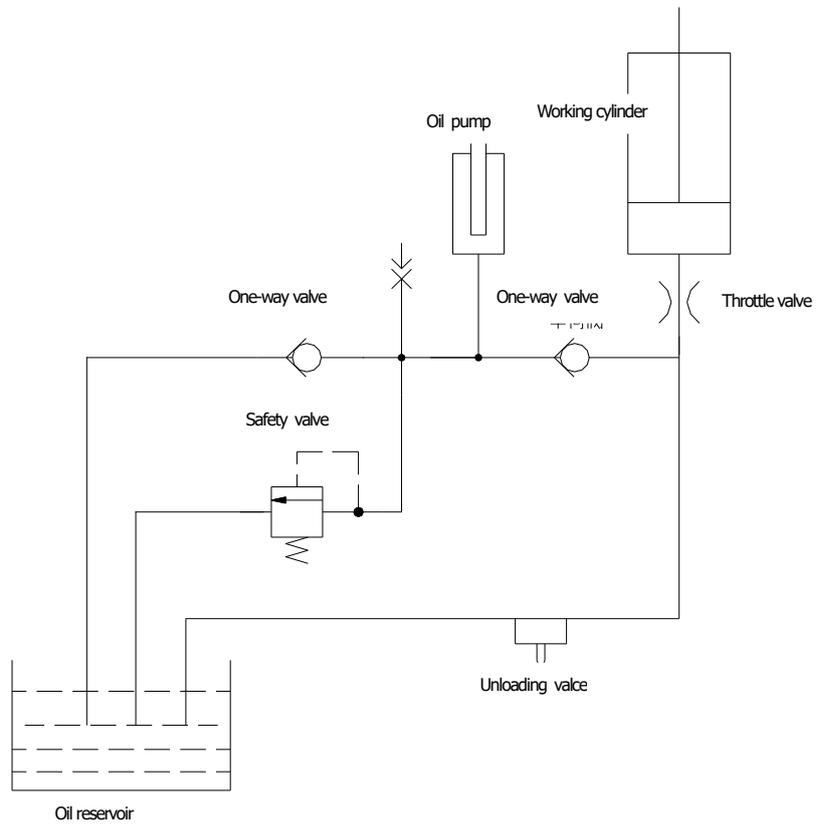

Faults	causes	Trouble shooting
The truck can not be raised or the lifting height is not enough.	<ol style="list-style-type: none"> 1) Steel ball (23) of the check-valve is not closed down. 2) Firing pin (28) withstands the steel ball (16). 3) Short of hydraulic oil. 	<ol style="list-style-type: none"> 1) Clean the valve opening and change the steel ball (23). 2) Adjust the tension rate of the steel wire rope to make firing pin at suitable place, and add or fill lubricant to the pin roll (30) 3) Add enough hydraulic oil.
The table-board rises then descends.	<ol style="list-style-type: none"> 1) Steel ball (23)(24)(16) of the check-valve is not closed down. 2) Firing pin (28) withstands the steel ball (16). 	<ol style="list-style-type: none"> 1) Clean the valve opening and change the steel ball (23) (24) (16). 2) Adjust the tension rate of the steel wire rope to make firing pin at suitable place, and add or fill lubricant to the pin roll (30)
The table-board does not descend	The travel of the firing pin (28) is not enough to open the steel ball (16).	Adjust the tension rate of the steel wire rope to make firing pin at suitable place, and add or fill lubricant to the pin roll (30)
Oil leakage at firing pin.	The o-ring (29) is damaged.	Change the o- ring (29).
Oil leakage at pump (2), pump core (5) and piston rod (44).	The seal ring (1)(3)(47)(48) are damaged.	Change the seal ring (1)(3)(47)(48)

IX. Assembly method (referring to drawing 1):

- (I) EHW5 type trucks are folding type. Only if the handle is pulled up, this series truck can be operated.
- (II) The handle and foot lever of EHW5 type lift table are dismantled when ex-factory, they might be fixed together by the users when using. The assembly methods are as follows:
- Handle installation method: according to the developed drawing, fix the handle (1) to mounting hole of the truck body (18) with bolt (64), spring washer (63), flat washer (62), then screw down the bolt (64) with wrench.
- Foot lever mounting: insert the foot lever (47) into the hole of the square bar (60), screw in the screw (42), then put in the plain washer (6) and the spring washer (11) respectively and screw down the nut (12).

X. Structure diagram and principle diagram

See the principle diagram of the hydraulic system in the attached drawing (3)

Principle specification

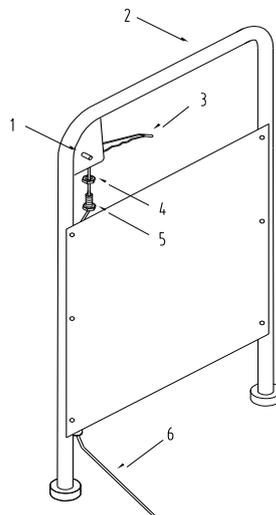

1. The restriction check and the constant pressure overflow valve leak oil at the same when no-load, the no-load vehicle descend faster, and it can meet the customers the demand.
2. When the load is more than 50kg, the system pressure is 8MPa, the constant pressure overflow valve closes automatically, the hydraulic oil leaks through the restriction check, the vehicle descend slowly, and this agrees with the safety standards.

Spare parts catalogue

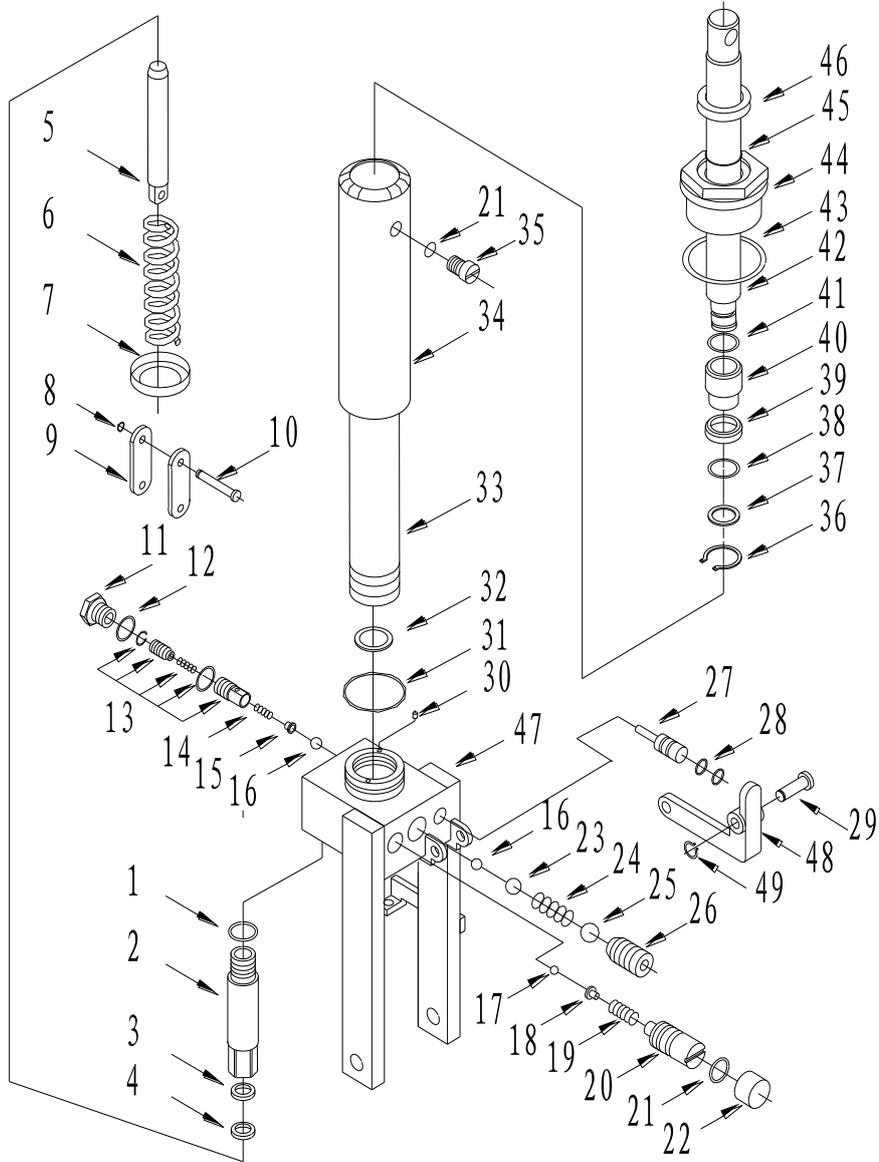

1. Explosive drawing and parts list of EHW5 handle
2. Explosive drawing and parts list of EHW5 pump
3. Explosive drawing and parts list of EHW5 assembly

Explosive Drawing and Parts List of Handle

No.	Description	Qty.
1	Spring pin	1
2	Handle bar	1
3	Knob	1
4	Nut M8	1
5	Screw	1
6	Pull rod	1

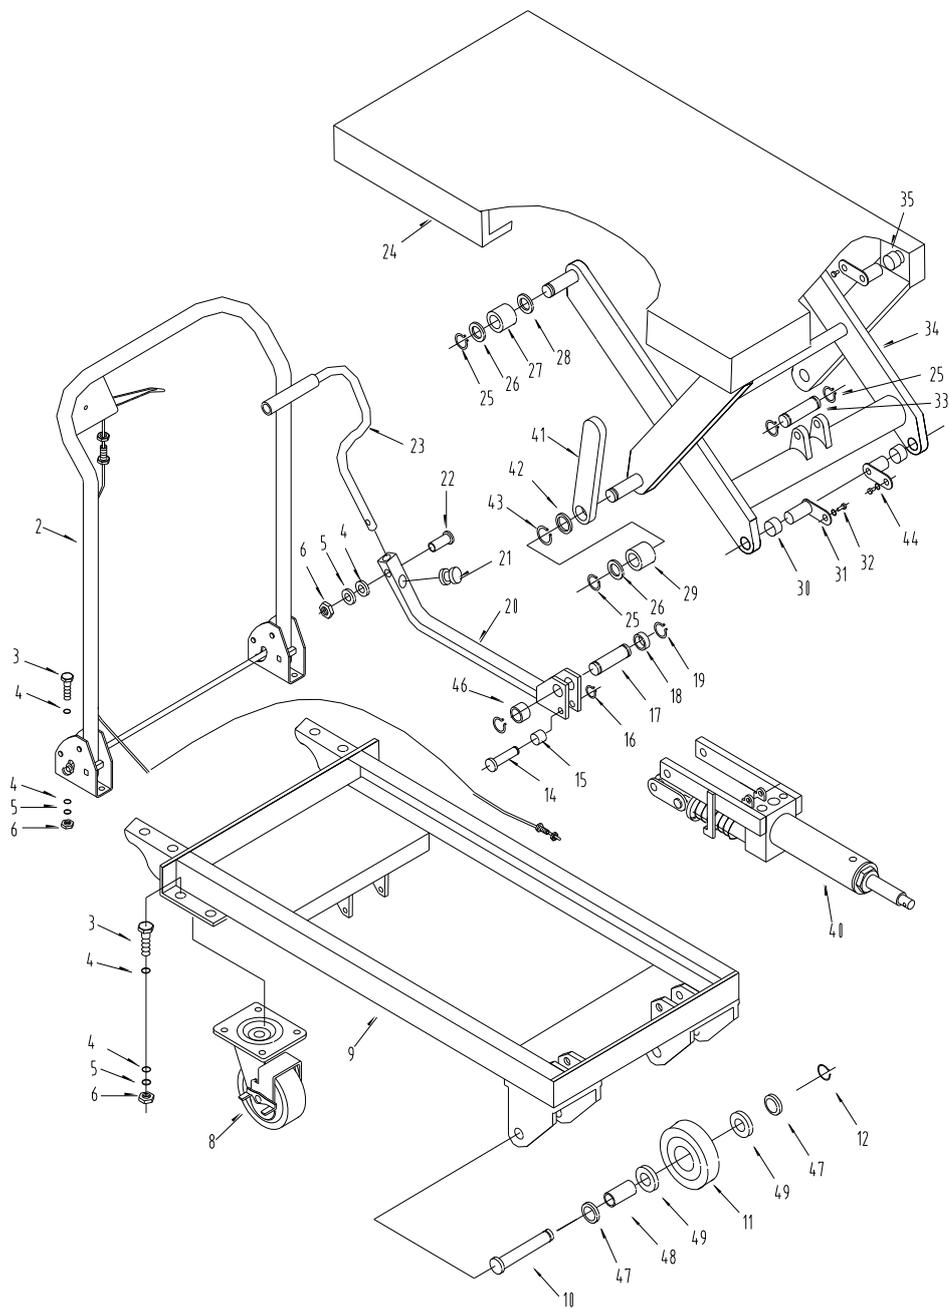

Explosive Drawing of EHW5 pump

Parts List of EHW5 pump

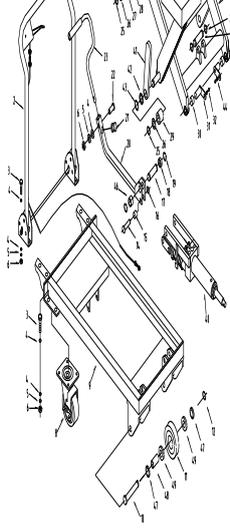

No.	Description	Qty.
1	O-ring	1
2	Pump cylinder	1
3	Yx- seal ring	1
4	Dust ring	1
5	Pump plunger	1
6	Spring	1
7	Spring seat	1
8	Retaining ring for axle 10	1
9	Joint plate	2
10	Pin	1
11	Screw	1
12	Copper washer 20	1
13	Damp valve	1
14	Spring	1
15	Spring seat	1
16	Steel ball 6.35	2
17	Steel ball 4.5	1
18	Spring seat	1
19	Spring	1
20	Adjusting screw	1
21	O-ring 7.5×2.65	2
22	Cover ring	1
23	Steel ball 9.5	1
24	Spring	1
25	Steel ball 1/2 (12.7)	1
26	Screw M16×18	1
27	Strike pin	1
28	O-ring 6.9×1.8	2
29	Shaft	1
30	Filter	1
31	O-ring 65×3.55	1
32	Rectangular ring section	1
33	Cylinder	1
34	Housing	1
35	Screw	1
36	Retaining ring for axle 25	1
37	Washer	1
38	O-ring 33.5×3.55	1
39	Cup packing	1
40	Bush	1
41	O-ring 20×2.65	1
42	Piston rod	1
43	Rectangular section sealing	1
44	Cylinder cap	1
45	O-ring 31.5×3.55	1
46	J Shaped steel frame rubber sealing 32×45×6.5	1
47	Base	1
48	Lever plate	1
49	Retaining ring for axle 8	1

Explosive drawing of EHW5 assembly

Parts List of EHW50 assembly

No.	Description	Qty.
2	Handle bar	1
3	Bolt M8×25	12
4	Washer 8	25
5	Washer 8	13
6	Nut M8	13
8	Universal Wheel 5"	2
9	Frame	1
10	Shaft	2
11	Wheel 5"	2
12	Retaining ring for axle 12	2
14	Shaft	1
15	Bush	1
16	Retaining ring for axle 10	1
17	Shaft	1
18	Retaining ring	1
19	Retaining ring for axle 20	2
20	Connecting rod	1
21	Cushion	1
22	Bolt M8×30	1
23	Pedal bar	1
24	Table	1
25	Retaining ring for axle 16	6
26	Washer 16	4
27	Washer	2
28	Washer	2
29	Roller	2
30	Bush	2
31	L-pin	4
32	Bolt M6×10	4
33	Shaft	1
34	Arm	1
35	Bush	2
40	Pump	1
41	Support	2
42	Washer	2
43	Retaining ring for axle 24	2
44	Washer 6	4
46	Retaining ring	1
47	Bush	4
48	Hollow shaft	2
49	Bearing 6203	4

EG VERKLARING VAN OVEREENSTEMMING
volgens Machine-richtlijnen 2006/42/EG bijlage 11 A.

AFGEGEVEN DOOR :

ESTIL-NEDERLAND v.o.f. – ALPHEN AAN DEN RIJN
Magazijnweg 7 2404 CE

Wij verklaren hiermede, geheel onder eigen verantwoordelijkheid,
dat dit product voldoet aan de gegevens zoals deze op het
Type – plaatje zijn vermeld en in de gebruiksaanwijzing omschreven.

TYPE	: EHW
SERIE	: 0
WERKBELASTING	: 0 kg
TESTBELASTING	: 0 kg
GETEST door	: EA

Wij verklaren, dat het product in overeenstemming is met de
Bepalingen van de: EG- Machinerichtlijnen 2006 / 42 / EG en onder
de norm EN 12100, 1494+1 en dat is voldaan aan de verplichtingen
Voortvloeiend uit de Machinerichtlijnen.
