CHENG DAY MACHINERY WORKS CO., LTD.

SAFETY-IMPORTANT

The use of any hoist and trolley presents some risk of personal injury or property damage.

That risk is greatly increased if proper instructions and warnings are not followed. Before using this hoist, each user should become thoroughly familiar with all warnings, instructions and recommendations herein.

THIS SYMBOL POINTS OUT IMPORTANT SAFETY INSTRUCTIONS WHICH IF NOT FOLLOWED COULD ENDANGER THE PERSONAL SAFETY AND/OR PROPERTY OF YOURSELF AND OTHERS.

READ AND FOLLOW ALL INSTRUCTIONS IN THIS MANUAL AND ANY PROVIDED WITH THE EQUIPMENT BEFORE ATTEMPTING TO OPERATE YOUR "U-MEGA" ELECTRIC CHAIN HOIST.

1. FOREWORD

This manual contains important information to help you properly install, operate and maintain the U-MEGA electric chain hoist and to maximize performance, economy and safety.

Please study its contents thoroughly before putting the electric chain hoist into operation. By practicing correct operating procedures and by carrying out the preventative maintenance recommendations, you will be assured of dependable service. In order to help us to supply correct spare parts quickly, please always specify -

- (1) Hoist model
- (2) Serial number
- (3) Part number, plus the description.

We will have your trust of Cheng Day's long term satisfactory service as our belief. Should you have any queries, please contact:

(Please ask for a company's stamp from your local agent)

2. MAIN SPECIFICATIONS

2.1 Specifications

The following specifications are common to all electric chain hoists.

Table 2-1 Specifications

Item		Detail	
Working temperature range (°C)		-5 to +40	
Working humidity range (%)		85 or less	
Protection	Hoist	IP 55	
	Push button	IP 65	
Electric power supply		Three Phase, 50 Hz, 220V~600V Three Phase, 60 Hz, 220V~600V	
Noise Level (dB)	Dual speed hoist	75	
Chain Size	Type	Nominal diameter (mm)	Pitch (mm)
	NHD-050-1	6.3	19.1
	NHD-100-2	6.3	19.1
	NHD-100-1	7.1	20.2
	NHD-200-2	7.1	20.2
	NHD-200-1	Ø10	30.2
	NHD-300-2	Ø10	30.2
	NHD-500-2	Ø11.2	34

Remarks:

- (1) Contact an authorized dealer for information on using the hoist over the working temperature or humidity range
- (2) Intended use: This hoist has been designed for vertically lifting and lowering loads under normal atmospheric conditions.
- (3) Noise levels are measured at a distance of 1m horizontally from the hoists during normal operation.

2.2 Mechanical Classification (Grade) and Life

Safety and life of electric chain hoists are guaranteed only when the equipment is operated in accordance with the prescribed grade.

U-MEGA electric chain hoists have been designed for grade 2m in the FEM Regulations (FEM 9.5.11). Details are provided in Table 2-2. Average daily operating time and total operating time are determined by load distribution.

Table 2-2 Mechanical classification

Load Spectrum (Load distribution)	Definitions	Cubic mean value	Average daily Operation time (h)	Total operating time (h)
1 (light)	Mechanisms or parts thereof, usually subject to very small loads and in exceptional cases only to maximum loads.	$k \leq 0.50$	4 - 8	12500
2 (medium)	Mechanisms or parts thereof, usually subject to small loads but rather often to maximum loads.	$0.50 < k \leq 0.63$	2 - 4	6300
3 (heavy)	Mechanisms or parts thereof, usually subject to medium loads but frequently to maximum loads.	$0.63 < k \leq 0.80$	1 - 2	3200
4 (very heavy)	Mechanisms or parts thereof, usually subject to maximum or almost maximum loads.	$0.80 < k \leq 1.00$	0.5 - 1	1600

% operating time
Load spectrum 1

% operating time
Load spectrum 2

% operating time
Load spectrum 4

2.3 Safety Devices

(1) Motor brake

The “Electro-Magnetic Brake” unique design, it features simultaneous motor braking upon switching off power even under full load condition, quick action and high frequency use.

(2) Mechanical Brake w/Clutch & Overload protection device

The unique design includes mechanical brake & overload dual protection. Mechanical clutch operates with motor brake, which can offer exactly, very limited slipping & quick braking. OL device prevents over loading to damage goods, and ensure secure operation and product's life-span.

(3) Hook and hook latch

The hook is drop-forged from high tensile steel and heat treated for strength and toughness. The bottom hook is capable of 360° rotatable and fitted with a safety latch for added security.

(4) Phase Error Relay

To test 3 phases if any wrong phases connection. It can stop power once any abnormal situation to protect the hoist.

(5) Limit Switch

Upper and lower limit switches are fitted for switching off power automatically in case of over lifting or over lowering.

(6) Emergency Stop Device

This button is used to quick stop the hoist in an emergency situation. It is a red, mushroom shaped swivel button, located at the uppermost position of the pendant. When pressed, power to the equipment is switched off and the button locked automatically. Turn it clockwise can release the lock and enable re-start. (Illust. 1)

(Illust. 1)

2.4 Specifications and Dimensions

Model	Capacity (kg)	Lift (m)	%ED	Hoisting			Traversing		
				Speed(m/min)		Motor kw x pole	Speed(m/min)		Motor kw x pole
				60Hz	50Hz		60Hz	50Hz	
NHD-050-1	500	3	40/20	10/2.5	10/2.5	1.1/0.28 x 2/8P	24/6	20/5	0.12/0.03 x 2/8P

3.SAFETY RULES

DANGER

This hoist is not designed for, and should not be used for, lifting, supporting, or transporting personnel. Any modifications to upgrade, re-rate, or otherwise alter the hoist equipment must be authorized by either the original manufacturer or a qualified professional engineer.

Only trained personnel are allowed to operate the hoist.

DANGER

Do not use the hoist in explosive atmosphere.

Prior to each lifting operation, it is essential to make sure that:

- (a) the correct lifting sling is being used.
- (b) the lifting sling is located in the hook as shown below (Illust. 2) and that a safety latch has been fitted.

(Illust. 2)

Firm and steady button operation is required. Never push the button switch intermittently.

Always avoid excessive inching operation.

Always make sure the hoist motor completely stops before reversing.

Always leave the push button switch cable and bottom hook vertically static after completion of operation, never leave them at any position which may cause swing or slip.

Slings must be applied to load evenly and centrally to ensure correct balance. Never lift any

object which is insecure or out of balance.

Never use hoist to end or side pull a load. (Illust. 3)

Never wrap around and hook back the load chain as a sling to lift a load. (Illust. 4)

(Illust. 3)

(Illust. 4)

! WARNING

Do not use the hoist chain as a welding electrode.

! DANGER

Never stand under a raised load (Illust. 5)

(Illust. 5)

Lifting must always be personally attended. Never leave a raised load unattended.

Over-capacity-load lifting is hazardous and should not be undertaken.

Never lift a load when the load chain is twisted.

Regularly inspect and check the condition of load chain. Do not operate with damaged chain.

4. INSTALLATION

4.1 Unpacking Information

After removing the hoist from its packing box, carefully inspect the external condition of the electrical cables, contactor, gearbox and motor casing for damage.

Check and ensure that these items are present.

Each hoist is supplied as standard with the following accessories.

1. Chain bucket	1 set
2. Power cable	0.5 meter
3. Push button control switch	1 piece

Table. 4-1

CAUTION

If power supply deviates from standard by more than $\pm 10\%$ abnormal operation or damage to the motor may result. It is imperative to ensure correct voltage supply before commencing operation.

4.2 Voltage

WARNING

Connection to power supply before installation procedures having been completed is strictly prohibited.

4.3 Installation

Prior to installation check and ensure that the top hook assembly is securely attached to the hoist by means of the lock bolt.

NOTE: If the hoist is to be suspended from an electric trolley, assembly may be eased by firstly removing the top hook, attaching it to the trolley load plate, then refitting the top hook to the hoist.

Assemble chain bucket —

(Illust. 6)

Connect power supply to hoist and operate the push button switch. This operation must be carried out by a trained person.

(Illust. 7)

Operation Test

- (a) Please reverse any two connections while the direction is incorrect.
- (b) Firmly push  switch button to lower load chain until the limit spring touches the limit switch. Power should be cut off automatically.
- (c) Firmly push  switch button to check the collection of load chain into chain bucket.
- (d) Check the emergency stop device function :
While holding down either  or  button on the push button switch, push the emergency stop button. Check that the hook stops when the emergency stop button is pushed. Also, check the hoist does not move in response to the push button switch.
Finally, check that the emergency stop device pops out when turned to the right and that operation can be resumed thereafter. If the equipment fails to pass any of the above checks, check the wiring and automatic locking function of the emergency stop device.
- (e) Check load chain lubrication (It has been lubricated at our works, but the lubricant may dry out during transportation). It is also advisable to keep a small amount of lubricant in the chain bucket to keep the chain in an oil bath.
- (f) Check chain position. Weld joints on links must face the same direction (Illust. 8). Correct chain operation can only be achieved when all joints are vertically in line.

CAUTION

The bottom hook on multi-fall hoist must never be rotated as shown below.
(Illust. 9)

Illust. 8

Illust. 9

5. OPERATION

After running test and checks have been completed, the hoist will be ready for normal operation.

WARNING

Since dealing with heavy loads may involve unexpected danger all of the "SAFETY RULES" (Ref 3.) must be followed and the operator must be aware of the following points while using the hoist.

- (1) The operator must have a clear and unobstructed view of the entire working area before operating the hoist.
- (2) The operator must check that the entire working area is safe and secure before operating the hoist.
- (3) When using the hoist with a motorized trolley, the operator must take care to prevent excessive load swinging by sympathetic use of the trolley controls

6. MAINTENANCE AND INSPECTION

DANGER

Do not perform maintenance on the hoist while it is carrying a load except monthly checking for the brake or limit switch.

DANGER

Before performing maintenance do not forget to affix tags to the power source and the push button switch reading : "DANGER", "EQUIPMENT BEING REPAIRED".

6.1 Maintenance

- (1) Check the level of gearbox lubricant after the first 500 hours operation, thereafter check every 3 months and lubricate accordingly.

NOTE: We recommend using lubricant oil equivalent to SHELL S4 WE460.

- (2) Always keep the hoist unit dry and never misuse it in a manner likely to reduce its durability.
- (3) When it is necessary to keep the unit outdoors, a protective covering should be fitted.

6.2 Inspection

1. Daily inspection: Before starting daily operation, check the followings:

- (a) Correct power supply.
- (b) "Up", "Down" and "Emergency Stop" test runs under no load.
- (c) Correct motor performance.
- (d) No abnormal or excessive noise.
- (e) No malfunction of the bottom hook safety latch.
- (f) Proper function of moving/turning parts and brake.
- (g) Well-lubricated load chain.

2. Monthly inspection

(a) Load chain.

Distorted, elongated or worn chain link will not sit properly on the load sprocket wheel and may cause chain breakage and/or damage to hoist unit. To ensure safe and efficient operation, the chain links must be checked for their pitch (inside length), inside width and outside width monthly according to following table.

Model	Dia-Meter (mm) (d)	Inside Length (mm) (p)	Inside Width (mm) (b1)	Outside Width (mm) (b2)	Breaking Load (kN)
NHD-050-1 NHD-100-2	Ø6.3	19.1	7.9	21.4	50
NHD-100-1 NHD-200-2	Ø7.1	20.2	8.1	23.2	63.3
NHD-200-1 NHD-300-2	Ø10.0	30.2	12.5	33.2	128
NHD-500-2	Ø11.2	34	14	37.5	160

Table 6-2-a

WARNING

Always use the hoist manufacture's recommended parts when repairing a hoist.

Measuring

- (1) The chain gauge is useful and convenience for measuring.
- (2) Please use a chain gauge to measure the chain pitch and diameter, per illustrations (1) and (2).
- (3) Every chain ring must be measured, and the chain must be replaced when one of chain ring is wear or stretch.
- (4) It will be a cutting-out possibility if you use a chain fall either wear or stretch during operation.
- (5) Do not replace a chain fall by yourself and do please contact specific either service centers or contractors to help you out.
- (6) The chain fall must be replaced whole instead of in part.

(7) The load sheave, regulator, and regulator plate wheel must be replaced the same time as you do a chain replacement.

Note : Chain must be in perfect condition without any defects.

(b) Check hook with care. If hook shows cracks, deformation or excessive wear, it should be replaced.

Top Hook

Bottom Hook

Model	Capacity (kg)	Hook	Dimensions (mm)									Allow Stress (kg/mm ²)
			H1	B1	B2	H2	B3	B4	C	g	E

Top Hook=T Bottom Hook=B

3. Annual inspection

Your dealer should be asked to perform this inspection.

- (a) Check gearing for any excessive wears or damage.
- (b) Replace gearbox lubricant completely (NHD-050-1 & NHD-100-2 / 800C.C., NHD-100-1 & NHD-200-2 / 1400C.C., NHD-200-1 & NHD-300-2 & NHD-500-2 / 4000C.C.) as following table for your reference.

NOTE: We recommend using lubricant oil equivalent to SHELL S4 WE460.

※ Table of recommended oils according to DIN 51354

ISO-VGDIN 51519 viscosity At 40°C mm ² /s (cST)	Approximate viscosity of the VG Categories 50°C mm ² /s (cST)	ARAL	BP	ESSO	MOBIL OIL
VG460	251	Aral Degol BG 460-BMB 460	BP Energol GR-XP 460	Spartan EP-460	Mobilgear 634

ISO-VGDIN 51519 Viscosity at 40°C mm ² /s (cST)	Approximate viscosity of the VG Categories 50°C mm ² /s (cST)	SHELL	TEXACO	I.P.	AGIP	TOTAL
VG460	251	Omala oil S4 WE460	Meropa 460	Mellana 460	Blasia 460	Carter EP 460

Table 6-2-b

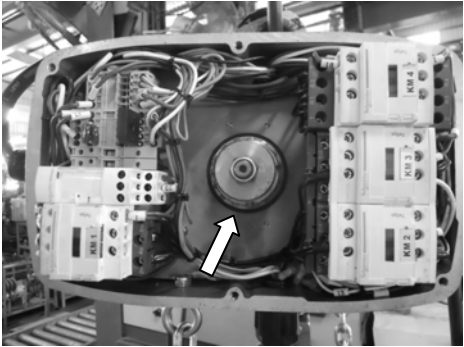

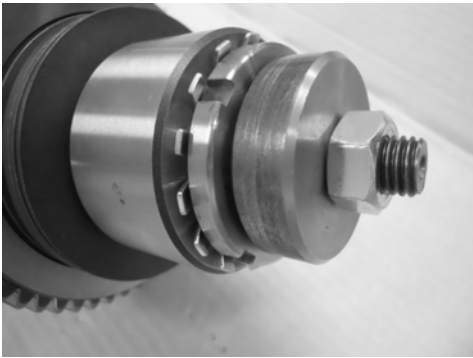

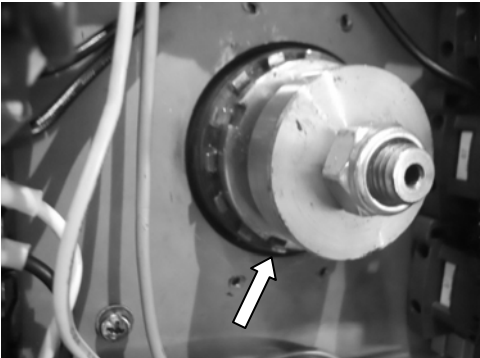

The permissible tolerance for each VG category is $\pm 10\%$ of the tabulated values.

- (a) Check brake lining for any wear or damage.
- (b) On completion of above checks, lift a load several times to ensure good performance of the hoist before starting duty operation.

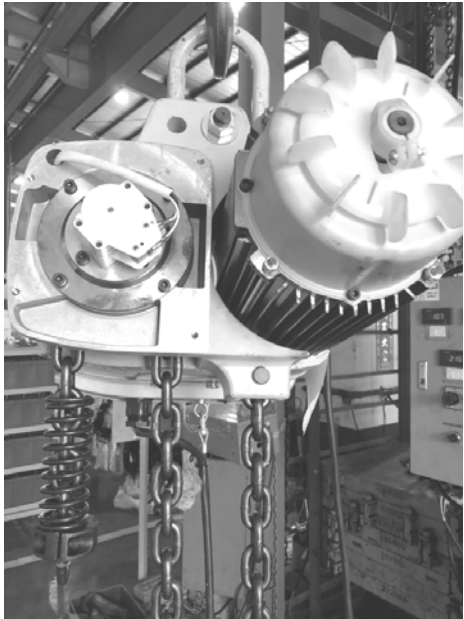

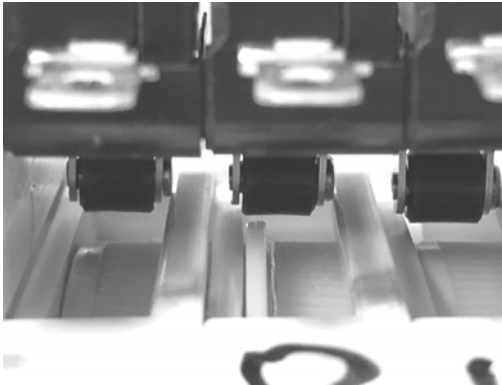

Warranty Details

1. Warranty Period : One year for Mechanical Spare Parts after purchase the product.
2. Non-Warranty Scope:
 - (a) Electrical Spare Parts (ex. Contactor, Pendant, Phase Error Relay, etc.)
 - (b) Expense Spare Parts (ex. Chain Bucket, Brake Lining, etc.)
 - (c) Damage caused by unsuitable operation.
(ex. Galvanize plant, Chemical Plant, Dye-work, etc.)
 - (d) Damage caused by operating on the wrong electric voltage.
 - (e) Damage caused by user amend the product.
 - (f) Damage caused by natural disaster.
3. Warranty Scope shall be permitted by Cheng Day Machinery and Within One Year of damaged Mechanical Spare Parts Repair and Replacement.
(circumstance stated in detail No. 2 are not included.)

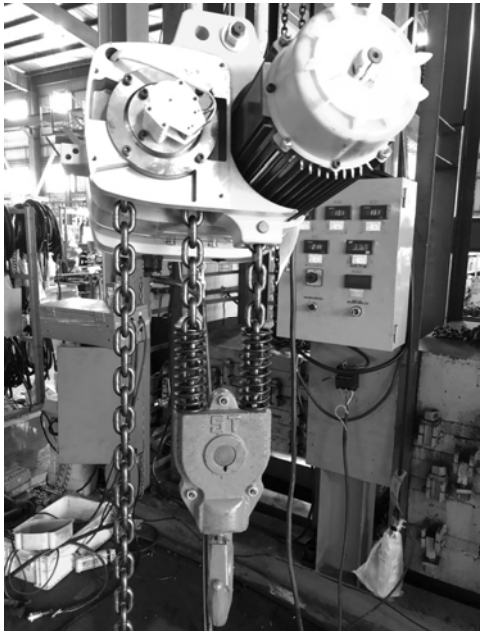

6.3 Overload clutch adjustment instructions

Description	Picture
<p>Mechanical Brake and Overload Protection</p>	
<p>Setting is 125% rated load</p> <ol style="list-style-type: none"> 1. Use rolling bearing nut fixture to tighten the clutch nut fixture. 2. It can be able to lift in 100% rated load. 3. Adjust the load to 125% rated load 4. Clutch is slipping, cannot lift, setting complete. 5. Setting the clutch does not slip when lifting a load 6. Loosen the adjusting nut, and set the clutch slip, be unable to lift the load. 7. Adjust load to 100% rated load, clutch does not slip and can be able to lift the load. 8. Adjust the load to 125% rated load, clutch slip the loading material. Setting complete. 9. Setting of overload is 100% rated load can be able to lift and 125% rated load have to slip. 	 
<p>After setting complete, level rolling bearing nut washer at nut groove, tap washer to secure it, to prevent loosening.</p> <p>Adjust load to 100% rated load, It is able to lift in 100% rated load, Setting complete.</p>	 

6.4How to adjust the geared Limit Switch for NHD-200-1/NHD-300-2/NHD-500-2

Description	Picture
1. Put in load chain from the side of chain bag and goes through chain sprocket, press the pendant (down) button, let the chain be at Lower Limit Switch position.	
2. Lower L/S flange set up to be close to the middle (you can see there are 3 switch, the middle one). Adjust Plastic screw by using #4 Hex wrench.	
3. When the chain tail at lower LS is too longer.	

Description	Picture
<p>4. Adjust lower L/S plastic screw (the middle one) by clockwise direction, the chain shortens. While adjust it by counterclockwise direction, the chain tail becomes longer. Once touch the LS, it needs to back off the distance about 1 meter. After L/S trips off, it can be re-adjust again.</p>	
<p>5. The suitable chain tail location is 300-400mm. Need to double check if it stops at correct location after completing the adjustment.</p>	
<p>6. Press push button UP, let the bottom hook be at right location for Upper Limit Switch if the hook position is too longer.</p>	

Description	Picture
<p>7. Counterclockwise direction to set up upper LS plastic screw, see the photo. Adjust counterclockwise direction if bottom hook at too longer position. If it' s too short, clockwise to adjust it. Once touch the LS, it needs to back off the distance about 1 meter. After L/S trips off, it can be re-adjust again</p>	
<p>8. Adjust it till the bottom hook is at right position (about 300-400mm), double check and test to make sure it' s completed.</p>	

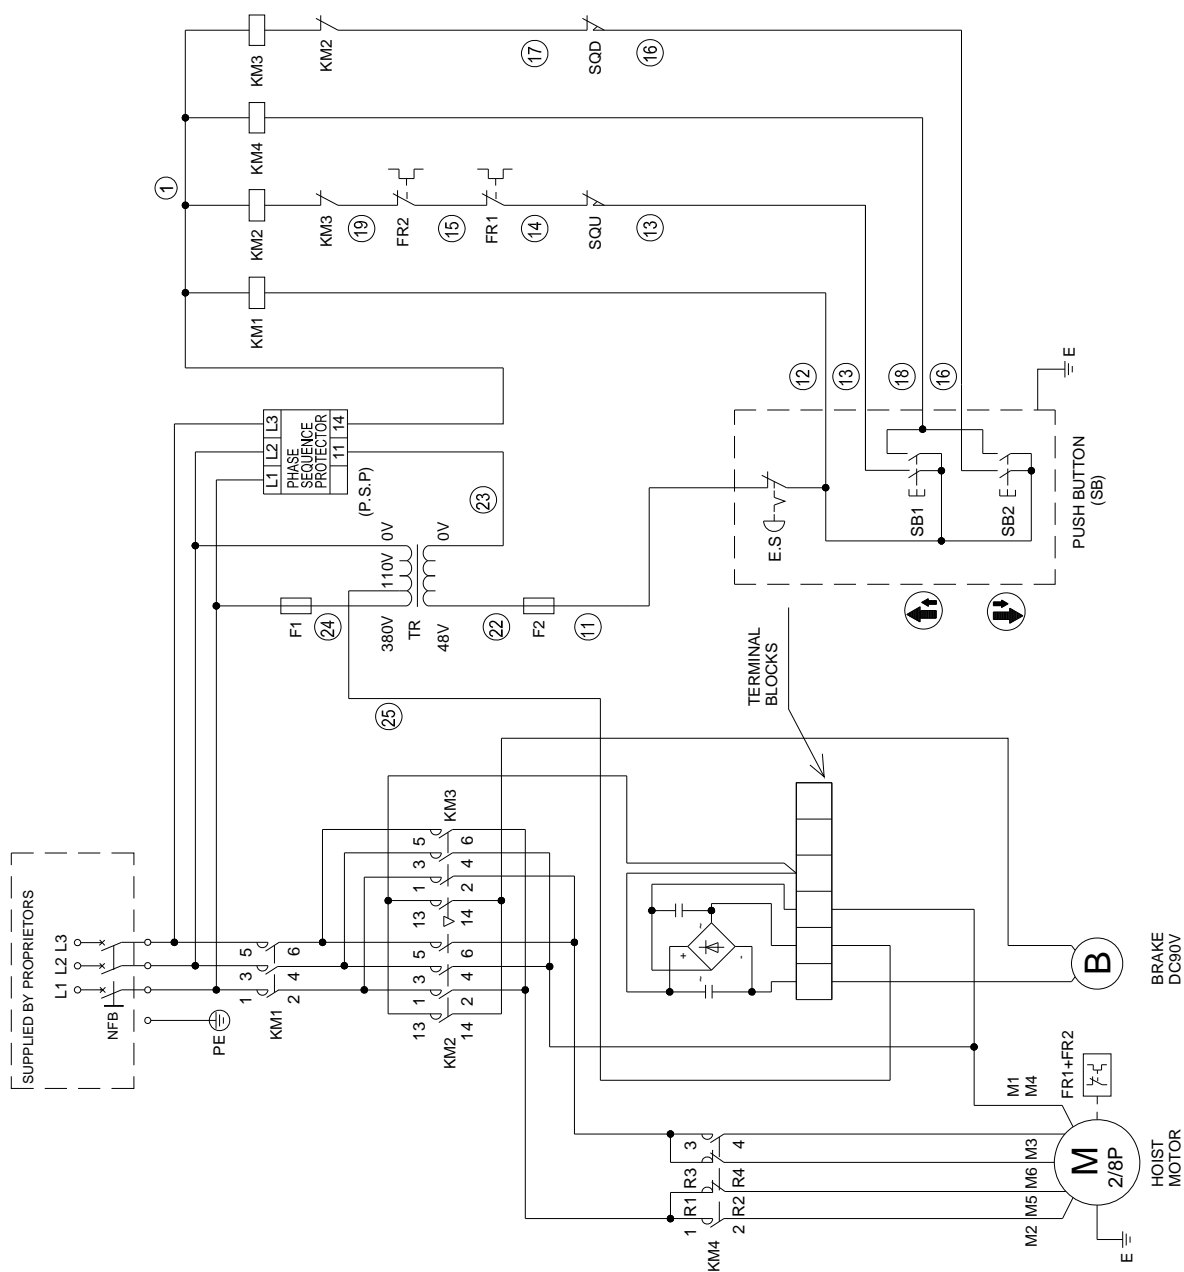

Please note

1. When adjust the plastic screw, face to L/S like below photo direction.
2. Check the plastic screw, if turning wrong direction, adjust it by opposite direction. Need to re-test and check if position is correct.
3. Once touch the LS, it needs to back off the distance about 1 meter. After L/S trips off, it can be re-adjust again

7.TROUBLESHOOTING

7.1 Wiring Diagrams

SF17001096-4101

7.2 Troubleshooting and Remedial Action

SITUATION	CAUSE	REMEDY
Hoist will not operate	(1) Broken/disconnected power or control circuit wire.	Locate and repair/reconnect
	(2) Low supply voltage	Check if 10% reduction in voltage, have main supply checked
	(3) Motor hums but does not rotate	Check phases to motor-insulate and repair
	(4) Emergency stop button release pushed	Check the cause as necessary
	(5) Faulty contactor	Operate manually if hoist runs then control circuit/coil is faulty-locate fault and repair. If hoist does not run then check main supply. If input supply is correct but there is a faulty output supply then replace the contactor
Hoist will not stop	Welded contacts in contactor	Replace contactor
Brake slips	Abrasion of motor brake	Replace
Hoist runs but does not lift	(1) Clutch slipping	Contact your authorized U-MEGA dealer — this adjustment needs to be carried out on a test rig
Abnormal sound on load chain/chain sprocket (2 falls)	(1) Chain dry (2) Worn chain sprocket (2 falls)	Lubricate Replace load chain and chain sprocket (2 falls)
Electric shock	(1) Poor earth connection (2) Accumulated foreign matter/ moisture on electrical parts	Provide correct earth connection Remove foreign matter/dry electrical parts
Oil leak	(1) No oil plug (2) Loose fitting of oil plug (3) No plug packing (4) Worn or deteriorated oil packing	Attach the normal oil plug Fasten the plug tightly Attach normal packing Attach the new packing

This technical diagram illustrates the exploded view of a gear box assembly. The components are numbered 1 through 41. The assembly includes a main housing (10) with a cover (9), a central shaft (29) with multiple gears (31, 14, 11, 28), and various bearings (3, 4, 5, 16, 25, 30, 32, 33), seals (2, 6, 7, 8, 23, 24, 34, 36), and fasteners (17, 18, 19, 20, 21, 22, 35, 37, 38, 39, 40). Dashed lines indicate the assembly path and alignment of the parts.

VERIFICATION OF COMPLIANCE

to the requirements of

Machinery Directive 2006/42/EC

Verification Report No. : RA/2016/90004C-01
 Representative Model : NHD-200-2
 Series Model(s) : NHTD-025-1, -050-2, -050-1, -100-2, -100-1, -200-2;
 NHD-025-1, -050-2, -050-1, -100-2, -100-1;
 NT-050-1, -050-2, -100-1, -100-2, -200-2;
 NTD-050-1, -050-2, -100-1, -100-2, -200-2;
 SH-025-1, -050-1, -100-1, -200-2; WNH-012, -025, -050, -100;
 WNT-012, -025, -050, -100; BLFD-008, -012, -016, -024, -032, -048
 Product Name : Electric Chain Hoist and Trolley
 Applicant : Cheng Day Machinery Works Co., Ltd.
 Address of Applicant : No. 173, Wen Chiu Rd., Dajia Dist., Taichung City 437, Taiwan.
 TCF Number : CHENGDAY(UMEGA)-2016-B1
 Date of Issue : September 12, 2016
 Date of Expiry : September 12, 2021
 Applicable Standard(s) : EN ISO 12100:2010, EN 14492-2 :2006+A1 :2009/AC :2010

Conclusion

Based upon a review of the Technical Construction File, the apparatus is deemed to meet the requirements of the above standard(s) and hence fulfill the requirements of:

Machinery Directive 2006/42/EC

Note : This verification is only valid for the apparatus and configuration described and in conjunction with the technical data detailed above.

The CE mark as shown below can be used, under the responsibility of the manufacture, after completion an EC Declaration of Conformity and compliances with all relevant EC Directives.

Authorized Signatory:
